DOCNEST™ DIGITAL CLINIC SUITE

Smart OPD Queue Management, Digital Prescriptions (Rx) & Reception Automation

PROPOSAL & TECH QUOTATION
REF: MED-CLINIC-2026
Date: October 2026
Valid for: 45 Days

CLINICAL OVERVIEW FOR DOCTORS & CLINIC DIRECTORS:
DocNest™ is specialized software built for doctors to make daily clinic operations smooth, organized, and peaceful. It eliminates waiting room overcrowding, patient arguments over tokens, lost paper slips, and illegible handwriting errors. With one unified software, your **Doctor Consultation Chamber, Reception Counter, Waiting Room TV, and Pharmacy** work together in perfect harmony — without buying any costly servers or complex IT machinery.

1. How the Software Operates in Your Daily Clinic

No technical knowledge required — simple and intuitive screens designed for doctors and clinic staff:

Clinic Area / Role	What the Software Does (Clinical Function)	How it Helps the Doctor & Clinic
Doctor's Chamber **Consultation Screen**	• **1-Click Next Token Caller:** Tap 'Next' to call the next patient. Chime sounds automatically in waiting room. • **Rapid Digital Prescription (Rx):** Select pre-saved medicines with dosage (e.g. *1-0-1, After food*) in under 60 seconds. • **1-Click WhatsApp Share:** Instantly sends a clean digital prescription directly to the patient's WhatsApp.	**Saves 1.5–2 hours of writing time daily. Zero shouting in the clinic. All patient history saved forever.**
Waiting Room TV **Lobby Display Screen**	• **Live Token Display:** Runs on any ordinary Smart TV in your waiting room. • **Audio Chime:** Pleasing bell rings automatically when the doctor calls the next token. • **Clinic Branding:** Shows clinic name, doctor's specialty, and current serving token.	**Cuts lobby noise and crowding by 75%. Patients stay seated comfortably until their number is called.**
Reception Counter **Front Desk Screen**	• **Fast Walk-In Token:** Issue patient token in 5 seconds (just Name & Phone number). • **QR Code Standee:** Walk-in patients can scan the desk QR poster with their phone to view their live token. • **OPD Queue Overview:** Shows who is waiting, who is inside, and who is completed.	**Eliminates paper slip chaos and front-desk confusion. Staff can focus on helping patients.**
In-House Pharmacy **Compounder Screen**	• **Instant Prescription Flow:** Doctor's prescribed medicines appear immediately on the pharmacy screen. • **Clear Medicine Names:** No guessing difficult doctor handwriting. • **1-Click Dispensed:** Mark medicines delivered with total bill calculation.	**Stops prescription walkouts to outside medical stores. Increases clinic pharmacy revenue by 30%+.**
Patients on Mobile **Home & Market Tracking**	• **Live Mobile Queue Tracker:** Patients see live token progress on their phone from home or market. • **No Waiting in Crowds:** Patients arrive at the clinic only 10 minutes before their turn. • **Permanent Records:** Patients receive PDF prescription on WhatsApp.	**Waiting time drops from 2.5 hours to 15 mins. Delighted patients recommend your clinic to others.**

2. Simple 4-Step Patient OPD Journey

STEP 1: Token Issue	STEP 2: Calm Waiting	STEP 3: Consultation	STEP 4: Medicine Dispensing
Patient books online or gets a token at reception. Receives live token number.	Patient tracks token on phone or watches Waiting Room TV screen with audio chime.	Doctor clicks 'Next Patient', types medicines in 60s, and sends Rx to WhatsApp.	Compounder sees Rx on screen, dispenses medicines accurately without error.

3. Software & Technology Pricing Packages

Clear, transparent investment options for software setup, cloud hosting, and technical maintenance:

Software Package Tier	Software Features & Included Modules	One-Time Software Setup	Monthly Cloud & Tech Support
