DOCNEST™ HEALTHCARE PLATFORM

Next-Gen Clinic Management, Real-Time OPD Queue System & Digital Health Ecosystem

COMMERCIAL PROPOSAL
REF: DN-PROP-2026-V1

Date: October 2026
Validity: 45 Days

EXECUTIVE OVERVIEW:
DocNest™ is an enterprise clinical operations platform engineered specifically for clinics, polyclinics, and healthcare centers. It eliminates waiting room overcrowding, paper token chaos, handwritten prescription errors, and financial fee leakage. Built on cloud-native technology with real-time WebSockets synchronization, the platform seamlessly connects **Patients, Doctors, Dispensaries/Compounders, Reception Desks, and Waiting Room Smart TVs** without requiring expensive proprietary hardware.

1. System Architecture & Complete Functional Modules

The software delivers an end-to-end clinical workflow through 7 dedicated role-based portals:

Role Module	Core Capabilities & Operational Functions	Direct Clinical Benefit
Doctor OPD Controller Web & Tablet	• Live token caller with WebSockets broadcast • Realtime patient wait-ring and queue progression • 1-click consultation status updates (Active, Paused, Done)	**Saves 1.5–2 hours of doctor time daily; zero shouting in clinic.**
Digital Rx Builder Prescription Engine	• Autocomplete drug formulary with dosage regimens (1-0-1) • 1-Click WhatsApp delivery directly to patient mobile • Instant thermal print format & cloud medical history	**Zero lost records; 100% legible prescriptions eliminate pharmacy dispensing errors.**
Smart TV Lobby Display Waiting Room Mode	• Fullscreen digital token display for clinic waiting areas • Automated audio chime sound on token advance • Shows current serving token, patient name & clinic branding	**Cuts lobby crowding by 75%; creates modern corporate hospital ambiance.**
Patient Web Portal Mobile Responsive	• Online appointment and token booking • Remote live queue tracking from home/market • Access past digital prescriptions and family records	**Reduces patient in-clinic wait from 150 min down to 15–20 min.**
Pharmacy / Dispense Compounder Portal	• Direct digital pipeline of doctor prescriptions • Order fulfillment tracking (Pending, Dispensed, Delivered) • Integration with Medicave inventory pipeline	**Recovers 30%+ prescription leakage that usually walks out to external shops.**
Reception QR Flyer Desk Tool	• Dynamic printable clinic poster with embedded QR code • Walk-in patient self-service scan & queue tracking • Fast offline patient manual registration	**Cuts front-desk manual registration burden by over 70%.**
Admin & AI Auditor Master Dashboard	• AI Revenue Anomaly Auditor detecting unlogged cash fees • AI Predictive Footfall & Rush Forecaster • Doctor fee reconciliation, ledger audits, and NEFT payout logs	**Stops 8–10% cash leakage; gives owners total financial transparency.**

INFRASTRUCTURE HIGHLIGHT: Built on Next.js 15, PostgreSQL Realtime (Supabase), and Tailwind CSS. **Zero proprietary hardware required** — runs smoothly on existing smartphones, reception PCs, and standard Smart TVs.

2. Financial & Operational Cost Impact (Before vs. After)

Economic analysis based on an active outpatient clinic handling ~1,000–1,200 patients/month at Rs. 300 average fee:

Operational / Expense Category	Before Implementation (Traditional Manual Clinic)	After DocNest Implementation	Monthly Net Benefit & Savings (INR)
Paper Stationery & Token Slips	Rs. 2,500 – Rs. 3,500 / mo Printed slips, counter pads, registers	Rs. 300 – Rs. 500 / mo Digital tokens & QR self-scan	**Save: Rs. 2,500 / mo** **85% paper cost reduction**
Front-Desk Staff Overhead	Rs. 18,000 – Rs. 22,000 / mo 2 clerks for line calling & manual logs	Rs. 10,000 / mo 1 coordinator (multitasking)	**Save: Rs. 10,000 / mo** **50% staff overhead savings**
Prescription Pads & Archiving	Rs. 3,000 – Rs. 4,000 / mo Printed letterheads & physical files	Rs. 0 – Rs. 400 / mo Digital Rx & secure cloud storage	**Save: Rs. 3,200 / mo** **90% document savings**
Unrecorded Fee Leakage **Cash Collection Discrepancies**	Rs. 20,000 – Rs. 28,000 / mo ~8% of gross fees lost to manual gaps	Rs. 1,000 – Rs. 2,000 / mo AI Anomaly Auditor logs all tokens	**Recover: ~Rs. 22,000 / mo** **Direct recovered revenue**
Pharmacy Prescription Leakage **Walkouts to External Chemists**	Rs. 25,000 – Rs. 32,000 / mo 35% patients leave clinic pharmacy	Rs. 6,000 – Rs. 8,000 / mo Digital Rx directly sent to dispensary	**Gain: ~Rs. 20,000 / mo** **Retained dispensary profit**
Patient Drop-Offs & No-Shows	~15–20% patients walk away Frustrated by 2-3 hour wait times	< 3% drop-offs Remote token tracking on phone	**Recover: ~Rs. 17,000 / mo** **Consultation fees saved**
Software & Cloud Maintenance	Rs. 0 / mo (No software)	Rs. 2,500 / mo (Cloud & hosting)	Net cost: -Rs. 2,500 / mo

DIRECT EXPENSE SAVINGS:	RECOVERED REVENUE:	NET CLINICAL GAIN:
Rs. 15,700 / month	**Rs. 59,000 / month**	**+Rs. 72,200 / month**

Clinical Efficiency & Experience Benchmarks

Average Patient In-Clinic Wait Time Before: 120 – 180 Minutes **After DocNest: 15 – 25 Minutes (85% Faster)**	**Doctor Daily Documentation Time** Before: ~75 Hours / month on paper **After DocNest: ~20 Hours / month (Saves 55 hrs)**
Prescription Record Accuracy Before: <10% stored (frequent lost slips) **After DocNest: 100% digital cloud & WhatsApp**	**Pharmacy In-House Retention** Before: ~60% capture rate **After DocNest: 90%+ retained within clinic**

3. Commercial Investment Quotation & Package Options

Choose from 3 customized implementation packages based on your clinical scale:

Package Tier	Scope of Deliverables & Inclusions	One-Time Setup Fee	Monthly Support (AMC)
OPTION 1: STANDARD Core Clinic Package	• Doctor OPD Queue Controller + Patient Booking Web App • Digital Prescription Builder with 1-Click WhatsApp delivery • Waiting Room Smart TV Lobby Display mode • Reception Desk QR Flyer custom branding • Production Cloud Deployment (Vercel + Supabase Database)	**Rs. 1,49,000** One-time fee	**Rs. 5,000 / mo** Cloud maintenance, backups & bug fixes
OPTION 2: PROFESSIONAL ★ RECOMMENDED Polyclinic / Hospital Center	• **All Standard features included** • In-house Pharmacy / Compounder Dispensing Dashboard • **AI Revenue Anomaly Auditor** (cash leakage detection) • **AI Footfall Rush Forecaster** (staffing & token prediction) • Multi-Doctor support (up to 5 doctors under one roof) • **90 Days Comprehensive On-Site/Remote Warranty**	**Rs. 2,89,000** Best Value ROI	**Rs. 12,000 / mo** Priority SLA support, monthly database audits
OPTION 3: ENTERPRISE District SaaS Network	• **All Professional features included** • Full District Network: Village CSC Mitras & Block coordinators • React Native / Expo Mobile App Build (Android APK) • Unlimited Doctors, Clinics & Multi-Branch Support • Complete Source Code & Intellectual Property Handover	**Rs. 5,49,000** Full Enterprise IP	**Rs. 25,000 / mo** Dedicated engineer support, custom features

ALTERNATIVE ZERO-RISK SAAS SUBSCRIPTION MODEL: Prefer to avoid upfront capital expenditure? Opt for the **DocNest Cloud SaaS Model**: **Rs. 35,000 One-time Setup & Onboarding Fee** + **Rs. 4,500 / month per doctor** (or a 12% revenue share on online bookings). Includes ongoing cloud hosting, updates, and customer support with zero lock-in.

4. Implementation Timeline & Commercial Terms

Phase & Milestone	Timeline	Deliverable Scope	Payment Milestone
Phase 1: Setup & Cloud Provisioning	Week 1	Database schema setup, Supabase Realtime configuration, Vercel production hosting link	**40% Advance on Agreement Signing**
Phase 2: Customization & Onboarding	Week 2	Doctor credentials, OPD timing schedules, drug formulary setup, custom clinic branding	30% on User Acceptance Testing (UAT)
Phase 3: Staff Training & TV Hardware Sync	Week 3	Receptionist training, TV lobby display HDMI pairing, QR reception flyer printing test	20% on Live System Launch
Phase 4: Warranty & Optimization	30–90 Days	Live queue monitoring, speed optimization, staff query support, AI auditor calibration	10% Retention after 30 days live
